# Move your goods

Railroad transportation facilities are heavily taxed because of the tremendous increase in general business activity.

Transportation by motor truck can and must relieve the situation.

Railroads must be kept as free as possible to carry carload lots and long-haul freight.

Short-haul freight ties up both terminals and freight cars. This class of freight can be handled quicker and more economically by motor trucks.

We must not permit work that can and should be done by motor trucks to interfere with the steady movement of coal by the railroads to each and every center where it is needed.

Careful routing of merchandise by way of motor trucks will insure the continuous operation of many a plant.

If you need more trucks, buy them now. If your equipment needs repairing or overhauling, do it now.

A motor truck is only as good as the service behind it

# Breaking ice by mail

A sales manager discovered that two-thirds of the time of his salesman in talking to a prospect was consumed in costly introductory talk.

Before the salesman actually got down to selling, he consumed many valuable minutes proving that his firm was able and responsible—capable of living up to anything it undertook.

Now these things don't have to be said in the presence of the prospect. On these points printing carries as much conviction as conversation.

This sales manager used direct-by-mail advertising to break the ice for his men, and records show that a distinct saving of time was effected by this method.

If you are using printing to impress future customers with the character and ability of your firm, use good printing.

Good printing is the kind you get from good printers. You don't get it by accident, and you don't get it from worn type, cheap ink, and poorly selected paper.

> better paper better

> > printing

"Making it hasy to Plan Printing" is the title of a series of books on better direct advertising which printers and advertisers can secure on application to distributors of Warren's Standard Printing Papers.
